Alabi Ibrahim

Data Analyst

Lagos, Nigeria. | https://linkedin.com/in/alabi-ibrahim-73332b236
alabi0147@gmail.com | https://alabiibrahim.github.io/myportfolio/

PROFESSIONAL SUMMARY

Detail-oriented Associate Data Analyst with hands-on experience collecting, cleaning, validating, and analyzing datasets to deliver clear business insights. Skilled in SQL, Microsoft Excel, Power BI, Tableau, and Python. Proven ability to build dashboards, perform data quality checks, identify trends and patterns, and support stakeholders with actionable reports. Google and IBM certified, with end-to-end project experience in financial analysis, marketing analytics, logistics performance, and business intelligence.

TECHNICAL SKILLS

Data Analysis & BI: Microsoft Excel (PivotTables, Power Query, dashboards), Google Sheets, Power BI (data modeling, DAX), Tableau.
Programming: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Jupyter).
Databases & SQL: PostgreSQL, Microsoft SQL Server (joins, CTEs, subqueries, data cleaning and validation).
Practices: Data cleaning, data validation, data quality checks, A/B testing, statistical hypothesis testing, KPI tracking, report automation, stakeholder reporting.

EDUCATION

BSc in Economics (In Progress) | University of Lagos, Nigeria.

EXPERIENCE

Data Analyst (Freelance) Remote | 2025 - Present

• Standardized and validated raw financial datasets in Python, reducing recurring data errors by approximately 40% for monthly client reporting.
• Built automated Power BI dashboards that replaced manual financial reports, cutting preparation time and improving reporting efficiency by about 20%.
• Developed sales performance dashboards in Excel and Power BI to track KPIs against targets, supporting decisions linked to a 14% year-over-year profit improvement.

AI Powered Data Analysis - Intern | Excelerate | Sep 2026 - Oct 2026

• Build and train ML models to forecast future learning opportunities across the globe.
• AI assisted in documenting, testing and checking result against real data for visual and insights accuracy.

Data Analyst - Intern | Excelerate | Aug 2024 - Sep 2024

• Supported senior analyst in cleaning campaign data and building a dashboard that flagged underperforming ad campaigns, informing budget cuts that saved an estimated 18% in ad spend.
• Created automated Excel reports to track marketing performance trends for weekly reviews and prepared client-ready visualizations and insight summaries for stakeholders

PROJECTS

Real-Time Fraud Detection System | Apache Kafka, Docker, Python (XGBoost, SHAP), Streamlit.
https://alabiibrahim.github.io/Real_Time_Fraud_Detection_System/

• Designed and built an end-to-end real-time fraud detection pipeline including Kafka streaming, XGBoost classifier with SHAP explainability, graph-based fraud ring detection, and live Streamlit dashboard.
• Scored 6,362,620 transactions with 0.9999 ROC-AUC and 0.9834 PR-AUC; achieved 89% precision and 95% recall in flagging 4,027 fraud cases at under 50ms latency. Re-engineered ingestion pipeline to cut projected processing time from 7–8 days to under 1 hour (95% improvement) while boosting throughput by 85%.

Marketing A/B Testing Analysis | SQL Server, Python (SciPy)
https://alabiibrahim.github.io/Marketing_AB_Testing/
• Led full end-to-end marketing A/B test analysis: cleaned and queried over 588,000 records in SQL Server, then applied chi-square significance testing in Python on conversion outcomes between 'ad' and 'psa' groups.
• Found 'ad' variant drove 2.55% conversion rate versus 1.79% for 'psa' (chi-square = 54, $p < 0.005$). Conversion rose to 17.14% at 100+ impressions per user. Recommended reallocating budget away from underperforming variant and consolidating spend into high-reach placements.

Logistic Operations Analysis & Performance Report | Power BI
https://alabiibrahim.github.io/Logistic-Operations-Analysis-and-Performance-Report/
• Built an interactive 6-page Power BI report analyzing 85,410 loads and trips across 36 months for a trucking company, covering operations, delivery performance, fleet utilization, driver safety, and profitability.
• Surfaced $256.26M total revenue at 65% contribution margin; identified 87% detention rate, 43.9% on-time delivery rate, and high-risk drivers/routes. Delivered clear, filterable views that enable managers to pinpoint inefficiencies in facilities, routes, fleet age, and safety incidents for data-driven operational decisions.

VIRTUAL JOB SIMULATIONS

Data Science Simulation - Lloyds Banking Group | Oct - Dec 2025
• Built customer churn prediction model (Random Forest, ROC-AUC 0.82) using Python (pandas, scikit-learn); handled missing values, encoding, scaling, and hyperparameter tuning.
Data Analytics Simulation – Accenture | Feb - Apr 2025
• Cleaned, modeled, and analyzed 7 datasets in SQL to uncover content trends; presented insights via PowerPoint and video.

CERTIFICATIONS

• AI Powered Data Analysis, Excelerate. | 2026
• IBM Data Analyst Professional Certificate, IBM / Coursera. | 2025
• Google Data Analytics Professional Certificate, Google / Coursera. | 2024
• Data Visualization Internship Certificate, Excelerate. | 2024
