

ALABI IBRAHIM

Data Analyst

Lagos, Nigeria | +234 902 792 9795 | alabi0147@gmail.com

[linkedin.com/in/alabi-ibrahim-73332b236](https://www.linkedin.com/in/alabi-ibrahim-73332b236) | Portfolio: vercel-gamma-two-74.vercel.app

PROFESSIONAL SUMMARY

Freelance data analyst with hands-on experience turning messy datasets into clear, decision-ready reports for startups. Skilled in Excel, SQL, Python, Power BI, and Tableau. Google and IBM certified, with a public portfolio of end-to-end projects in financial analysis, database design, marketing analysis, and business intelligence.

TECHNICAL SKILLS

- **Analysis and BI:** Microsoft Excel (advanced: PivotTables, Power Query, dashboards), Power BI (data modeling, DAX), Tableau, Google Sheets.
- **Programming:** Python (Pandas, NumPy, Matplotlib, Seaborn, scikit-learn, XGBoost, SHAP, Jupyter).
- **Databases and SQL:** PostgreSQL, Microsoft SQL Server (joins, CTEs, subqueries, data cleaning and validation).
- **Data Engineering:** Apache Kafka, Docker, Streamlit (real-time streaming pipelines and live dashboards).
- **Practices:** Report automation, A/B testing, statistical hypothesis testing, stakeholder reporting, data validation, KPI tracking.

DATA ANALYTICS PROJECTS

Real-Time Fraud Detection System *Apache Kafka, Docker, Python (XGBoost, SHAP), Streamlit*

<https://alabiibrahim.github.io/Real-Time-Fraud-Detection-System/>

- **Role:** Designed and built an end-to-end, production-style real-time fraud detection pipeline from scratch, including a Kafka/Docker streaming layer, an XGBoost classifier with SHAP explainability, a graph-based fraud ring detection module, and a live Streamlit analyst dashboard.
- **Result:** Scored 6,362,620 transactions with a 0.9999 ROC-AUC and 0.9834 PR-AUC, achieving 89% precision and 95% recall in flagging 4,027 fraud cases at under 50ms latency per transaction; re-engineered the ingestion pipeline (batching and timer tuning) to cut projected processing time from 7-8 days to under 1 hour, a 95% improvement, while boosting data transmission throughput by 85%.

Marketing A/B Testing Analysis *SQL Server, Python (SciPy)*

<https://alabiibrahim.github.io/Marketing-AB-Testing/>

- **Role:** Led a full marketing A/B test analysis end-to-end: cleaned and queried over 588,000 records in SQL Server, then used Python to run chi-square significance testing on conversion outcomes between the 'ad' and 'psa' groups.
- **Result:** Found the 'ad' variant drove a 2.55% conversion rate versus 1.79% for 'psa' (chi-square = 54, $p < 0.005$), and that conversion climbed to 17.14% once ads reached 100+ impressions per user, insights used to recommend reallocating budget away from the underperforming variant and consolidating spend into high-reach placements.

Credit Card Fraud Risk Analysis *SQL, Power BI*

<https://alabiibrahim.github.io/Credit-Card-Fraud-Risk-Analysis/>

- **Role:** Cleaned and modeled transaction data in SQL, then built a two-page Power BI fraud monitoring dashboard covering card type, merchant, payment method, geography, time of day, and customer demographics for a fraud risk analyst audience.
- **Result:** Surfaced \$79.86K in fraud losses across a 53.67% fraud rate on \$150.57K in transactions, and pinpointed High Balance accounts as 87.6% of fraud cases and roughly 88% of total losses, plus ATM withdrawals and late-night hours as the highest-risk method and time window, findings translated into targeted monitoring recommendations.

Bank Loan Intelligence Dashboard *Power BI*

<https://alabiibrahim.github.io/Bank-Loan-Intelligence-System/>

- **Role:** Analyzed a loan portfolio dataset covering \$435M+ in issued loans to assess borrower risk and repayment quality.
- **Result:** Built an interactive dashboard tracking funded amounts, repayment rates, average DTI (13.3%), and good vs. bad loan segmentation, giving lenders a single view for monitoring portfolio risk.

Scalable Relational Database Architecture *SQL Server*

<https://alabiibrahim.github.io/Industry-Database-Design---SQL/>

- Designed and implemented a normalized relational database for a digital platform, applying industry standards for security, maintainability, and scalability.

Business Intelligence Report *Excel*

<https://alabiibrahim.github.io/Business-Sales-Intelligence-Report/>

- **Role:** Analyzed sales records across 300 customers and 50 product lines to surface revenue drivers, regional risk, and customer purchasing behavior.
- **Result:** Delivered findings as a management-ready report highlighting the products and regions driving profitability.

WORK EXPERIENCE

Data Analyst (Freelance) 2025 to Present

Remote | Thorstvedt - a Norway based retail startup owner.

- Standardized and validated raw financial datasets in Python, cutting recurring data errors by roughly 40% for a client's monthly reporting.
- Built automated Power BI dashboards that replaced manual financial reports, reducing preparation time and improving reporting efficiency by about 20%.
- Developed a sales performance dashboard in Excel and Power BI to track KPIs against targets, supporting decisions linked to a 14% year-over-year profit improvement.

Data Analyst Intern | Excelerate Aug 2024 to Sep 2024

Remote

- Supported a senior analyst in cleaning campaign data and building a dashboard that flagged underperforming ad campaigns, informing budget cuts that saved an estimated 18% in ad spend.
- Created automated Excel reports to track marketing performance trends for weekly reviews.
- Prepared client-ready visualizations and insight summaries for internal stakeholders.

VIRTUAL JOB SIMULATIONS (FORAGE)

Data Science Simulation | Lloyds Banking Group Oct 2025 to Dec 2025

- Built a customer churn prediction model using random forest, achieving an ROC-AUC of 0.82; handled missing values, categorical encoding, and feature scaling in Python (pandas, scikit-learn).
- Tuned hyperparameters with GridSearchCV and used feature importance analysis to translate model results into business recommendations.

Data Analytics Simulation | Accenture Feb 2025 to Apr 2025

- Cleaned, modeled, and analyzed 7 datasets in SQL to uncover content trends for a hypothetical social media client, then presented insights via a PowerPoint deck and video presentation.

CERTIFICATIONS

- Google Data Analytics Professional Certificate, Google / Coursera, 2024
- IBM Data Analyst Professional Certificate, IBM / Coursera, 2024
- Data Visualization Internship Certificate, Excelerate, 2024
