PROFESSIONAL SUMMARY

Freelance data analyst with hands-on experience turning messy datasets into clear, decision-ready reports for startups. Skilled in Excel, SQL, Python, Power BI, and Tableau. Google and IBM certified, with a public portfolio of end-to-end projects in financial analysis, database design, and business intelligence.

TECHNICAL SKILLS

Analysis and BI: Microsoft Excel (advanced: PivotTables, Power Query, dashboards), Power BI (data modeling, DAX), Tableau, Google Sheets.

Programming: Python (Pandas, NumPy, Matplotlib, Seaborn, scikit-learn, Jupyter).

Databases and SQL: PostgreSQL, Microsoft SQL Server (joins, CTEs, subqueries, data cleaning and validation).

Practices: Report automation, A/B testing, stakeholder reporting, data validation, KPI tracking.

DATA ANALYTICS PROJECTS

Bank Loan Intelligence Dashboard

Power BI

- Analyzed a loan portfolio dataset covering \$435M+ in issued loans to assess borrower risk and repayment quality.
- Built an interactive dashboard tracking funded amounts, repayment rates, average DTI (13.3%), and good vs. bad loan segmentation, giving lenders a single view for monitoring portfolio risk.

Scalable Relational Database Architecture

SQL Server (SSMS)

- Designed and implemented a normalized relational database for a digital platform, applying industry standards for security, maintainability, and scalability.

Business Sales Intelligence Report

Excel

- Analyzed sales records across 300 customers and 50 product lines to surface revenue drivers, regional risk, and customer purchasing behavior.
- Delivered findings as a management-ready report highlighting the products and regions driving profitability.

WORK EXPERIENCE

Data Analyst (Freelance)

2025 to Present

Remote | Thorstvedt - a Norway based retail startup owner.

- Standardized and validated raw financial datasets in Python, cutting recurring data errors by roughly 40% for a client's monthly reporting.
- Built automated Power BI dashboards that replaced manual financial reports, reducing preparation time and improving reporting efficiency by about 20%.
- Developed a sales performance dashboard in Excel and Power BI to track KPIs against targets, supporting decisions linked to a 14% year-over-year profit improvement.

Data Analyst Intern | Excelerate

Aug 2024 to Sep 2024

Remote

- Supported a senior analyst in cleaning campaign data and building a dashboard that flagged underperforming ad campaigns, informing budget cuts that saved an estimated 18% in ad spend.
- Created automated Excel reports to track marketing performance trends for weekly reviews.
- Prepared client-ready visualizations and insight summaries for internal stakeholders.

VIRTUAL JOB SIMULATIONS (FORAGE)

Data Science Simulation | Lloyds Banking Group

Oct 2025 to Dec 2025

- Built a customer churn prediction model using random forest, achieving an ROC-AUC of 0.82; handled missing values, categorical encoding, and feature scaling in Python (pandas, scikit-learn).
- Tuned hyperparameters with GridSearchCV and used feature importance analysis to translate model results into business recommendations.

Data Analytics Simulation | Accenture

Feb 2025 to Apr 2025

- Cleaned, modeled, and analyzed 7 datasets in SQL to uncover content trends for a hypothetical social media client, then presented insights via a PowerPoint deck and video presentation.

CERTIFICATIONS

- Google Data Analytics Professional Certificate, Google / Coursera, 2024
- IBM Data Analyst Professional Certificate, IBM / Coursera, 2024
- Data Visualization Internship Certificate, Excelerate, 2024
